India-UK Collaborative Industrial R&D Programme

Closing Date: 15 Apr 2015 (Please Note Registration closes 8 April 2014)

Description

The India-UK Collaborative Industrial R&D Programme aims to support business-led collaborative R&D projects between Indian and UK companies, working with academic organisations from both countries where appropriate.

The programme is jointly delivered by the **Global Innovation & Technology Alliance (GITA)**, on behalf of the **Department of Science & Technology (DST)**, Government of India and by Innovate UK in the UK. The programme will provide grant funding to help participants to build sustainable research partnerships and increase bilateral R&D collaboration with the aim of generating new Intellectual Property (IP) and developing technology prototypes/processes leading to economic growth and societal benefit.

Applications invited for Collaborative industrial R&D projects up to 2 years in duration – with the aim of future commercialisation.

This RFP/competition invites proposals in 4 areas:

- Cleantech Energy
- Affordable healthcare
- Advanced Manufacturing
- Use of Information & Communication Technologies (ICT) in any of the above focus areas.

ICMR-MRC joint initiative: aetiology and life-course of substance misuse and relationship with mental illness

Closing Date: 30 November 2014 (intention to submit), 09 January 2015 (closing date)

Whereas every effort has been made to ensure that the information given in this document is accurate, British High Commission or its supporting departments, accept no responsibility for any errors, omissions or misleading information in this document and no warranty is given or responsibility is accepted, as to the standing of any individual, firm, company or other organisation mentioned in this document.

<p>Description</p> <p>The UK Medical Research Council (MRC) and the Indian Council for Medical Research (ICMR) invite proposals for collaborative research projects, primarily for the development of longitudinal and clinical studies of substance misuse and associated consequences. This call is open for joint proposals from high quality research teams based in the UK and India. The UK component of this initiative will be funded under the Newton Fund (up to £2million). The Indian component of this initiative will be funded by ICMR.</p> <p>The Call aims to promote research collaboration between Indian and UK investigators in the area of substance misuse and mental health for exploiting the mutual strengths of the two communities. Examples of key issues agreed under this research partnership included investigations into the determinants and community-wide secondary consequences of alcohol addiction in India and the UK, including Indian communities in the UK. Research proposals are particularly welcomed that enable development of cohort studies and incorporate capacity building. Where appropriate, the work could build on existing partnerships/networks/cohorts. All studies should aim to enhance our understanding of the theme of the Call for Proposals and should demonstrate potential benefits to the UK and India.</p>	<p>Funding Type Research Funding</p> <p>Area Mental Health</p> <p>Contact: India UK</p> <p>More Details: Click here</p> <p>Apply here</p>

<h2 style="color: red;">Liverpool India Fellowships</h2> <p>Closing Date: 18 December 2014</p>	
<p>Description The University of Liverpool invites applications for the India Fellowships Programme 2015. The Fellowship Programme offers opportunities for both outstanding early career and established researchers from India to strengthen their experience of research and teaching in an international research-enriched environment. Up to 10 fellowships will be awarded annually.</p> <p>Fellowships are tenable for periods from three to six months. Fellows are expected to be in residence in Liverpool throughout the tenure of their fellowship and to play a full part in the activities of the University. An allowance of £1,200 per month to cover accommodation and living costs will be provided. In addition a one-off travel grant of £1,000 will be paid. Fellowships are expected to take place from September 2015, however there may be flexibility to start the fellowships at an earlier date.</p>	<p>Funding Type Fellowship</p> <p>Area Research</p> <p>More Details Click here</p> <p>Apply here</p>

<h2 style="color: red;">Chevening Gurukul Scholarships</h2> <p>Closing Date: 06 February 2015</p>	
---	--

Whereas every effort has been made to ensure that the information given in this document is accurate, British High Commission or its supporting departments, accept no responsibility for any errors, omissions or misleading information in this document and no warranty is given or responsibility is accepted, as to the standing of any individual, firm, company or other organisation mentioned in this document.

The Chevening Gurukul Programme is the UK Foreign and Commonwealth Office's flagship fellowship scheme for India and it is aimed at mid-career and high-flying young professionals from diverse backgrounds with a strong and demonstrable leadership potential.

Applications are invited from exceptional candidate from public, private and non-governmental organisations:

- Independent and creative thinker
- Able to demonstrate the ability to develop collaboration between India and the UK, often in complex and fast-moving areas.
- Able to work in diverse teams as well as individually, above all have the motivation to contribute constructively to the programme.
- Have had at least ten years' professional experience.

Every year twelve selected Gurukul Fellows will be offered an intensive, all expenses paid, twelve-week residential course at King's College London. We have curated a stellar programme which familiarizes India's future leaders with best practice case-studies of leadership in the fields of government, innovation, health, and industry in the UK through a variety of standard and heterodox methods, ranging from seminars, role-playing scenarios, shadowing, and site visits. Some of the themes included in the twelve-week programme are:

- The Challenge of Sustainability: Public Policy and Institutions in the 21st Century
- Stages of Democracy: Devolving Power and Governance in the 21st Century
- From Finance to Facebook: New Economies of Technology
- Regulating public life: New Rights and Judicial Activism
- Culture matters: The place of the arts in society
- Science, Technology, Industry: The Symbiotic Relationship in Practice
- Indo-UK Business and Trade Relations in the New Era

The Leverhulme Trust: Visiting Professorships

Closing Date: Please refer to the website [here](#).

Whereas every effort has been made to ensure that the information given in this document is accurate, British High Commission or its supporting departments, accept no responsibility for any errors, omissions or misleading information in this document and no warranty is given or responsibility is accepted, as to the standing of any individual, firm, company or other organisation mentioned in this document.

<p>Description</p> <p>The objective of these awards is to enable distinguished academics based overseas to spend between three and twelve months inclusive at a UK university, primarily in order to enhance the skills of academic staff or the student body within the host institution. It is recognised that Visiting Professors may also wish to use the opportunity to further their own academic interests. The over-riding criteria for selection are first the academic standing and achievements of the visitor in terms of research and teaching, and secondly the ability of the receiving institution to benefit from the imported skills and expertise. Priority will be given to new or recent collaborative ventures.</p> <p>Scope</p> <p>The sum requested should reflect the individual circumstances of the visitor and the nature and duration of the proposed activities. A maintenance grant up to a level commensurate with the salary of a professor in the relevant field at the receiving institution may be requested. Economy travel costs to and from the UK will also be met. Requests for associated costs, if justified by the programme, may include, for example, travel within the UK, laboratory consumables, and essential technical assistance.</p> <p>Please ensure that applications do not include any of the ineligible costs listed here.</p> <p>Eligibility :</p> <p>Applications must be made by a member of academic staff, based in a UK university or other higher education institution, who will be responsible for co-ordinating the visit. The host academic's employing institution must also agree to administer the grant, if awarded, and to provide appropriate facilities for the Visiting Professor.</p> <p>Visit here http://www.leverhulme.ac.uk/funding/VP/eligibility.cfm</p>	<p>Funding Type Visiting Professorship</p> <p>Area Research and teaching</p> <p>Contact Andreas Heiner 020 7042 9863</p> <p>More Details Click here</p> <p>Apply here</p>

Summary of EPSRC funding for International activities

Closing Date: Open calls- No closing date

Whereas every effort has been made to ensure that the information given in this document is accurate, British High Commission or its supporting departments, accept no responsibility for any errors, omissions or misleading information in this document and no warranty is given or responsibility is accepted, as to the standing of any individual, firm, company or other organisation mentioned in this document.

[Standard Research Grants, including Platform and Programme Grants](#)

Support for international collaboration can be in any research application to EPSRC, including travel, and subsistence and consumables for research staff to visit or have extended work placements to a partner's laboratory overseas. This is as well as the usual UK-based costs like staff, equipment, UK travel, and subsistence and consumables. This funding is flexible, so could be used to fill UK postdoctoral researcher positions with candidates from an international partner's laboratory subject to university recruitment guidance and visa requirements.

[Overseas Travel Grants](#)

Support for travel and subsistence, and salary costs of the Principal Investigator. These can be used for international travel to learn new techniques, visit overseas laboratories, gauge the state-of-the-art, or to start new collaborations. For example, they can be used to travel to European centres to develop collaborations with their researchers for bids to Horizon 2020.

[Bilateral Research Workshops](#)

N + N meetings can be held to exchange international ideas and expertise, with the hope of developing future collaboration. Roughly equal numbers of participants attend from each country. EPSRC fund travel and accommodation expenses of UK participants and, for UK meetings, core meeting costs.

It is preferred that a single UK participant coordinates the UK side and submits a single standard research grant proposal to cover all the UK side's costs. It is strongly advised that a discussion be held with the relevant EPSRC Theme Lead before submitting a proposal.

[Networks](#)

These UK-based activities link research groups and industrial organizations, often across disciplines, to develop new or enhanced collaborations. Funding is available to support workshops, visits, travel and part-time coordinators. Networks can include overseas partners.

Summary of MRC funding for International activities (for medical researchers)

Closing Date: Please refer to the website [here](#).

[MRC Career development award in biostatistics](#)

MRC fellowships enable outstanding individuals to undertake challenging projects in excellent research and training environments. An MRC award is there to enable you to do something truly out of the ordinary in training and developing you as a potential research leader.

The MRC has identified advanced biostatistics as a methodology of strategic importance to UK science. This fellowship aims to support outstanding individuals who have recently completed their PhDs and who are working in -or seeking to move into – statistically based, health-related research. It provides up to four years of support for the development and investigation of innovative statistical methods and their application in health research. The award also provides the opportunity to enhance the research training through placement in an overseas research centre, a second UK research centre or in UK industry. We expect to make up to three awards a year.

[MRC Fellowships](#)

MRC offers a wide range of non-clinical and clinical fellowships to support researchers at different stages of their scientific careers.

Lead applicant must be supported/ based at a UK university but can be Indian national.

[Including overseas co-applicants and collaborators on MRC Grants](#)

MRC permits co-applicants and collaborators on MRC grants to be based outside the UK where the nature of the research makes this necessary. Costs for non-UK based researchers **can** be included in such proposals, where necessary and justified, but lead applicant must be UK based.

[Working at an overseas research organisation as part of an MRC fellowship](#)

MRC will support the costs of up to one year of an MRC fellowship spent outside the UK for the purpose of research training (up to two years in the case of [career development awards](#)).
